

Renewable Energy Poem

Our main goal,
Is to destroy the use of coal

Forget the past,
Mined dirt will not last

How do you feel?
When you must pay for power bill

Solar rays that grow a flower,
Can also generate solar power

Even is frost,
Solar cells can reduce your electricity cost.

Get endless power,
Use solar hot water when you are in a shower

We used coal, we sinned,
We should use the power of wind

Your planet is getting hotter,
We should implement hydro with the power of water

You say you are smart,
You say "renewable energy will fall apart"

Forget your pride,
We can generate power from ocean tide

All living beings have bad taste,
For all kinds of nuclear waste

Stop being cruel,
Stop using fuel

You can travel far,
In an electric car

Don't go to Shell,
Charge your car battery with a solar cell
